

Transcript of study program

You must submit a transcript of study program along with the other required documentation.

The transcript of study program must be issued by your university. All relevant dental subjects must appear on the transcript, and the number of the teaching hours for each individual subject must be divided into theoretical and clinical hours.

It is important that the subjects on your transcript are listed under the exact titles specified below and are not grouped under general headings. If the subjects do not appear individually on your transcript under these specific titles, you must submit supplementary documentation for the teaching hours in the subjects concerned.

If your theoretical and clinical teaching hours are stated in “units” or “credits”, the documentation issued by your university must clearly specify how many teaching hours correspond to one “unit” or “credit”.

The following subjects must be clearly listed in your transcript:

Central subject areas in the Danish Dental Education basic subject areas

- Anatomy
- Biochemistry
- Cell Biology
- Microbiology/Immunology
- Pharmacology
- Physiology
- Psychology/Behavioural Sciences

Dental subject areas

- Anaesthesiology/Local Analgesia
- Cariology • Clinical Oral Physiology
- Community Dentistry

- Conservative (Restorative/Operative) Dentistry
- Dental Materials
- Endodontics
- Oral Medicine
- Oral Pathology
- Oral Radiology
- Oral Rehabilitation (Prosthetics/Prosthodontics)
- Oral Surgery (Maxillofacial Surgery)
- Orthodontics
- Pedodontics
- Periodontology

Curriculum

If you choose to submit a curriculum (syllabus), your name must be clearly stated in the document. The curriculum must also specifically refer to the period during which you completed your education and cover the same subjects as those listed in your transcript of study program.

The subjects and number of teaching hours (theoretical/clinical hours) stated in the curriculum must correspond to the subjects and teaching hours stated in your transcript.

A curriculum cannot replace a transcript of study program.

You must also specify precisely where in the documentation the relevant information for each individual subject can be found. If the documentation is unclear or information is missing, the curriculum cannot be taken into account when assessing your dental education.
